environmental concerns. It explains the role of this new technology in current global challenges.

"Remote Sensing" will discuss remotely sensed data application payloads and platforms, along with the methodologies involving image processing techniques as ... Remote Sensing and GIS Free ebook Download - What is Image Classification in Remote Sensing? Image classification is the process of assigning land cover classes to pixels. For example, these 9 global land cover data sets classify images into forest, urban, agriculture and other classes. Image Classification Techniques in Remote Sensing -
